Autobiography

My name is Yuliia. I'm 26. I have a small family. My father Bohdan works in a transport company and my mother Raisa works as a nurse in a hospital. I am married. My husband and I just graduated the educational establishment.

My height is 166 cm, weight is 57 kg.

I used to live at the village. At childhood, I looked after our domestic animals and poultry. When my parents were at work, I always fed, gave water to animals and moved them to the barns in the evening.

After finishing school, I stayed at home for two years. I helped my parents to look after their household. Then I worked as a cleaner in the hospital.

In 2017 I started to get a veterinary education at the Agrarian Lyceum. I entered the lyceum together with my husband. I was an active student and I took part in all events of our lyceum. During the first semester of study I was at the training livestock farm. I learned there how to take care of animals, I fed and watered them, too. I did cleaning at the whole farm.

But I wanted to develop and decided to find the opportunity to do the internship. I worked in Denmark together with my husband as a trainee on the dairy farm from November 1, 2019 to June 6, 2020. My responsibilities included milking cows, feeding calves, giving medicine for calves, hilling food for cows, mixing the calf feed with the mini loader. It was the great experience.

I can speak Ukrainian, Russian and English languages. As for my hobby, I like doing fitness and reading books.

Now when I graduated the Agrarian Lyceum and got both theoretical knowledge and practical skills, I want to apply all this experience on practice and surely to learn something new. I would like to get job in Norway. Norway is a magnificent country with great nature, rich culture and advanced economics. There is a lot to learn. I would be thankful for the opportunity to work at the dairy farm together with my husband.

Regards,

Yuliia
