Mother tongue	Ukrainian
Other language(s)	English - Good, Russian - Perfect
Driver licence	Car
Equipment experience	Tractor(high)
6. Hobbies and interests	Watching movies, running
7. Job start date	As soon as possible

Autobiography

My name is Olha. I am 24 years old. Talking about my family, my mother is a psychologist, she works at a school for special children. And my father is retired now, but he worked in the university like a fitness instructor for many years. And also I have an elder brother, he is an engineer. I'm single and don't have children.

I'm originally from the city, but when I was a kid I often visited my grandparents in the village. I liked to spend time caring for animals and it was my favourite hobby. My grandparents taught me how to feed and water them, because it was really interesting for me! I think, since this time I decided to be a vet.

I was studying at secondary school for 11 years. I liked to study, and most of all I liked Biology, Chemistry and PE lessons. I went to special section of track and field about 7 years.

After school I worked as an operator in the call-center and then went to Germany to earn some money. I worked in Germany for one season in 2015. My main work was picking strawberries.

When I came back home, I entered Professional Agrarian Lyceum. I became a student at the veterinary department in 2016 and graduated in 2019.

While studying, I got a possibility to train on a modern dairy farm in Denmark. I worked there from March 2017 till January 2018 on the farm, named "Steen Ranch farm". During this practical period I got necessary skills in

- giving food and water to animals,
- giving medicine,
- cleaning and washing the farm,
- driving a tractor with trailer,
- field works with a tractor (plowing, cultivation and cutting grass).

My second training period also was connected with daily care of cows. I had a training period on a dairy farm "Ojeby Gard" in Sweden. The farm had about 400 milking cows and about 600 calves. I tried to work with calves there because I had to do feeding. Also I did:

- milking twice a day,
- cleaning and disinfection the farm and equipment,
- driving a small tractor for cleaning.

My driving skills are high and I can perfectly operate a tractor with a variety of farm equipment. I can do field works. As for my driving licence, I have it on the car.

I like agriculture and want to continue getting new useful experience in this sphere. I would like to get a permanent job at a dairy farm in Norway because I dream of learning more about Norwegian milk production technologies. I look forward to getting started!

Regards,

Olha
