Driver licence	
Equipment experience	Milking machines(good)
6. Hobbies and interests	Taking pictures, flying a drone, drawing, cooking, breedings hogs, chicken, rabbits and growing vegetables.
7. Job start date	As soon as possible

Autobiography

My name is Mark Jayson Saquillo, I was born on the 18-th of April, 1996. I am from the Philippines. I am married but don't have children yet. Also I have mother, father and two brothers and a sister. My father's job is administrative aid in our municipality. My mother's job is to sell snacks at school. My older brother and young brother are now employed. My youngest sister is currently studying in the college.

My wife and I are living together, she is a high school teacher. Sometimes we tend to cook food that can be sold. We also breed chickens and pigs., and we also have vegetable garden where we grow different vegetables for our animals and for ourselves.

I studied at secondary school. After finishing it I found a job at the furniture factory. Then I took a gap year to try working and think about my future profession. After that I made my choice. It was farming.

I graduated from Agricultural University with a Bachelor of Science in agriculture major in Animal Science. I was studying from 2015 to 2020. During my study I was lucky to have some practice abroad. So I completed a one-year internship in Israel where I was working at the dairy farm from 2018 to 2019. It was not easy at first but as time went on the work became easier for me with the help of my colleagues. I have also been with different classes and races of people at work, where I learned how to respect each other. Our job was

assisting calf after calving and prepared colostrum for the first milk intake.,

assisting cows during calving.,

cleaning and disinfecting their pens, cages and equipment., milking yards and the surroundings of farm.,

giving vitamins and antibiotic injections based on advice of the veterinarian.,

examining animals to detect symptoms of illness and injury.,

feeding the cows., maintain bio-security and sanitation.,

milking the cows., nursing the calves.,

testing colostrum regularly using colostrometer.

I have a driving license but only for motorcycle. I speak English. As for my hobby I like taking pictures and drawing.

After I finished my study, I worked as an animal production specialist in feeds company for some months. My job was monitoring of all end user farms of our company feeds products, responsible on overall technical health management of the farms. I also didn't stay long at my job because of the pandemic so I decided to go home. Then started a new life in the province , I got married and began breeding animals at my home householding.

Now I would like to find a job in Scandinavian countries. I have heard a lot from my friends who are working in Europe that the sector of dairy farming is developed in Norway and Finland and I would like to find a job at the dairy farm there.

Regards,

Mark
